

REWORK • REPAIR • RECYCLE & SAVE

BGA REWORK • PCB REPAIR

- One Stop for Custom BGA, SMD and Conventional PCB Rework & Repair
- New In '08, We Will Have 3x In-house Capacity to Meet BGA Demand
- High-End Automated Rework Equipment Improves Yield
- X-Ray Inspection of Solder Joints Assures Quality
- Lead-Free Solder Meets RoHS Requirements
- Service Partner Exclusively with High-Volume Manufacturers & OEMs

By partnering with HVT, manufacturers can economically recycle and reuse expensive components that otherwise would be scrapped. Using highly controlled processes, your defective components are repaired to like-new condition and returned to you within days for use as replacement parts. Bottom line, you save money by lowering final-buy quantities, yet readily meet end-of-life demand for out-of-warranty PCBs.

YOU ARE INVITED to tour our Georgia facility. There's no better way to measure our capabilities, and understand the benefits that repair and recycling of electronic components can bring to your organization, than to see our operation in action.

CONTACT US TODAY TO ARRANGE A TOUR.
